

Single Needle Lock-stitch Machine with Automatic Undertrimmer(Basting Machine)

- A horizontal thread trimming mechanism for basting is mounted allowing the thread tension adjustment and work efficiency to be increased.
- Skipping of stitches when using thin threads is prevented by the horizontal hook and needle plate with needle guide
- Thick materials can be easily basted with the 15mm presser foot lift amount (after thread trimming)

Applications	Basting
Max. speed(r.p.m)	800
Presser-foot clearance(mm)	15.5
Needle	MTX190#14
Hook	Regular
Weight(kg)	32
