

Eastman®

LITTLE GIANT MODEL BB32

The BB32 features a 3-1/4" (8.26cm) blade with a high torque motor to maintain power under heavy loads.

This machine is an economical alternative for cutting heavier weight materials such as upholstery and industrial fabrics.

The double bevel blade eliminates material jamming between the blade and plate.

Like all Eastman round knives, the Little Giant is perfect for cutting large radius curves and straight lines.

Delicate Material Control

The hexagonal blade shears through fine fabrics, such as low ply delicate synthetics, without pulls or damage to the material.

Clean Cutting for Woven Materials

The single bevel 3-1/4" (Gentle Giant, model BBS32) hexagonal blade and shear plate provides a clean cut without material fraying or unraveling.

Consistent Speed

Our premium quality high torque universal motor maintains blade speed under heavy loads.

Little Giant Specifications*

Motors	110v, 1ph, 50/60Hz // 220v, 1ph, 50/60Hz
Horsepower	.10 hp
Weight	4 lbs. 2 oz. (2.27kg)
Blades	Standard: Carbon Round // Optional: High Speed Round, Carbon Hexagon
Sharpener Stones	Standard: 120 Heavy // Optional: 150 Medium, 220 Fine. Dual-wheel sharpener standard
Cutting Capacity	0.625 inches (1.59cm)
