

CRITICAL OPERATION CAN BE "EZ" (=EASY) NOW, WITH YAMATO "EZH" WORKSTATIONS.

- Circular hemming, one of the most critical operations on knitwear assembly has been much deskilled now.
- Maintaining hem is done by devices included in the workstation. It means, besides good quality stitching, the machine plays the role of right hand of skilled operator.
- What are required for operator is loading the work, overlapping and unloading. The rest is done by machine.
- Simplified electronics makes maintenance "EZ" too.
- Specifications:

3	5	5.6	1.4-3.6	1:0.7-2.0	7.0	5.5 (7.0)	5500	150
