JOKER

Labeller Range

HIGHLY ECOLOGICAL AUTOMATIC LABELLER

The purpose of labeller **Joker** is to eliminate all costs related to the identification of the pieces: costs of paper, costs of ink and time. The machine allows you to optimize the downtime and increase the efficiency of the system. Joker is equipped with wireless technology that allows you to interface directly to the CAD system thanks to the compatibility with HPGL, HPGL2 and ISO

files. The stickers labels can be with various sizes, are thermally printed and the information is customizable. The labels are placed at the center of the piece making the information immediately visible. Joker is a machine with a high ecological profile, since it eliminates the consumption of paper and ink and consequently reduces waste materials.

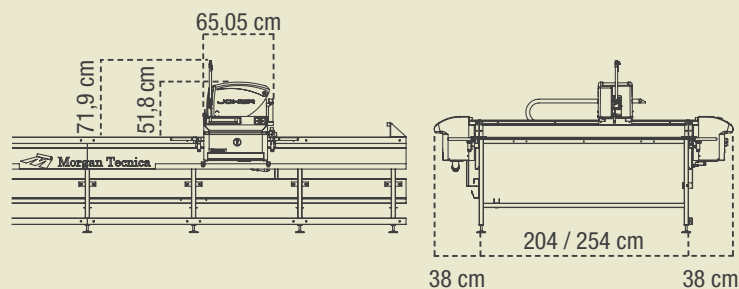

- PAPER AND INK SAVING
- OPTIMISATION OF PRODUCTION TIMES
- CUSTOMIZABLE THERMAL LABELS

JOKER

PRODUCTIVITY

- Labelling time less than the printing time of performance plotters.

QUALITY

- Information placed in the centre of each piece
- Personalize font
- Use of Barcode and Qrcode

CONTROL

- Latest generation of PLC
- Control of each state of the machine's components

ROI AND RUNNING COSTS

- No paper and ink
- No waste materials

USABILITY

- Morgan Style interface
- Innovative and user-friendly graphics interface (gesture oriented GUI)

RELIABILITY

- 1 year warranty + up to 2 years extension warranty available as an optional*

TECHNICAL SPECIFICATIONS

• Max speed	15 m/min
• Speed of application label	1 label / 3 sec
• Lay height	100 cm / 200 cm
• Installed electrical power	1 kw
• Voltage / Frequency	400 V 3 Ph 50/60 Hz
