320

Automatic Loaders Range

AUTOMATIC LOADER

Loader **320** for the roll storage and handling. The structure includes a storage area with a conveyORIZED multi-level platforms. The lower one is dedicated to the pre-loading of rolls already in the correct sequence. The upper one is dedicated to collecting the used rolls,

unloaded by the spreader machine. The roll loading/off-loading system is managed in a fully automatic mode in order to minimize the idle time of the spreader machine and improve its productivity.
